Profile Summary

- Software Engineer specializing in full-stack Next.js development and robust Laravel applications with 14+ months of hands-on experience.
- Database Growth: Comfortably managing SQL databases while actively mastering PostgreSQL to handle more scalable, complex architectures.
- ERP Experience: Focused on maintaining large-scale ERP software, building new features, and keeping clients happy with direct technical support.

Experience

SISGO GLOBAL TEKNOLOGI, PT - Software Engineer

May 2025 - Present

- ERP & Omnichannel Development: Built and optimized full-stack ERP apps and Omnichannel systems with Next.js and Laravel, tackling core modules like finance, inventory, and purchasing to smooth out business workflows.
- Operations & Client Support: Handled everything from database management (SQL/PostgreSQL) and internal cPanel deployments to working directly with clients, turning their everyday feedback into fresh production features.

Personal Projects

Personal Website | Rive, Next.JS | [GitHub Repo](#)

- Built a high-performance portfolio using Next.js and Tailwind CSS to feature my engineering and design work. Featuring a fully responsive and clean layout, the site is optimized for speed and smooth interactivity, providing a seamless and engaging experience across all devices.

Notion-Like Project Management | Next.JS, RESTful APIs | [GitHub Repo](#)

- Built a clean multi-project management app using React and Tailwind CSS to keep simultaneous workflows organized and efficient. Focused heavily on speed and smooth transitions, the platform pairs a minimalist UI with a mobile-first design for a seamless, responsive workspace on any device.

Pokédex Site | Next.JS, External API | [GitHub Repo](#)

- Built a responsive Pokédex app engineered to handle massive data feeds with zero lag. The platform cuts down load times and smooths out data retrieval, making it incredibly fast for users to search, filter, and collect information on the fly.

Education

Institute Technology of Adhi Tama Surabaya

Sep 2020 - Feb 2025

Bachelor of Computer Science, GPA: 3,79 / 4,00

Surabaya, East Java

Community Involvement

SurabayaDev, Social Media & Design Team

Sep 2024 - Present

- Designed visual assets and event campaigns to level up the community's brand identity and keep local tech enthusiasts engaged and connected.

Technical Skills
